

Invasive species are organisms such as plants, animals, bacteria and insects that are not from around here and cause harm (*environmental, economical or to human health*). They can eat the food of native organisms, steal their homes and make native species sick. The Cisma coordinator needs your help in finding all the words listed below!!!

Casey needs a home! Can you draw Casey a home below?

Remember to:

- LOOK** for invasive species!
- LEAVE** plants and animals at the park and beach!
- LEARN** about invasive species!
